DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on august 24,2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1- 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Honma et al.(6,645,743).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

Art Unit: 1711

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

PHA structure of Claim 1 or Claim 2 anticipated by PHA structure disclosed by Honma (see claim 1, formula (2) wherein R_1 represented by formula (4) and R_3 is COOR_4 .

PHA structure of Claim 3 (see formula (4)) anticipated by PHA structure of formula (3) – see Honma claim 1.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1- 5 and 12-40 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,645,743.

Although the conflicting claims are not identical, they are not patentably distinct from

Art Unit: 1711

each other because they are obvious variants of each other and claimed subject matter of Claims 1- 5 of Application No.10,531,226 significantly overlapping in scope with claimed subject matter of claims 1-16 of US Patent No. 6,645,743 – as it explain above.

3. Claims 1- 6 and 12- 40 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1- 4 and 18 - 36 of copending Application No.10/532,136. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variants of each other and claimed subject matter of Claims 1- 4 and 18 - 36 of Application No.10,532,136 significantly overlapping in scope with claimed subject matter of claims 1- 6 and 12 -40 of copending Application No.10/531,226:

Chemical structure of specific PHA copolymer claimed in claim 1 ("136") could be identical(or fully encompasses) and for this reason is not patentably distinct from chemical structure claimed in ("226") when PHA comprising unit of formula (3) of Claim1 ("226") , wherein R_z comprises a residue of formula (13) or (14) of Claim 4 of "226".

This is provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

THIS ACTION IS NOT MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
